

Morehouse M1000B2

For 1.1 High Explosives storage and transporting

20' shipping container according to ISO-standard. Net weight 4,5 tons, permissible load 13 tons. Now also available with an integrated hook end.

ADR/VAK/EXIII inspection, type consent by Finnish Defence Forces 02.02.2005. Maximum load of high explosive material 400 kg/m².

M1000B2 is designed for class 1.1 explosives storage and ADR-transporting.

There are two parts in the container; cargo space and accessory compartment. All the accessories are controlled from the accessory compartment.

The floor of the space is made of semi-conducting material and all the metal surfaces are grounded.

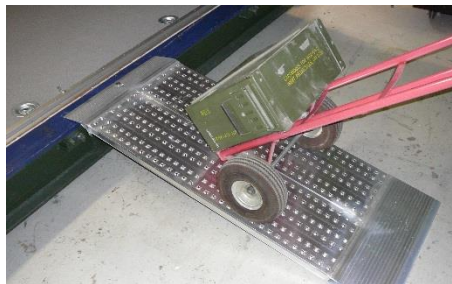

Container is equipped with Munters air dryer which enables low and stable humidity in the cargo space.

The cooler make container's use possible also in hot circumstances. Ceiling series reduces container's heat load.

Heating is available as optional extra equipment.
